GENERAL INFORMATION SCIENTIFIC COMMITTEE AND EDITORIAL BOARD

- **D. A. Indeitsev** (IPME RAS, St. Petersburg, Russia) — *Co-Chairman*
- **A. M. Krivtsov** (St. Petersburg State Polytechnical University, IPME RAS, Russia) — *Co-Chairman*
- **I. E. Berinskii** (IPME RAS, St. Petersburg State Polytechnical University, Russia) — *Scientific Secretary*
- **O. S. Loboda** (St. Petersburg State Polytechnical University, IPME RAS, Russia) — *Scientific Secretary*
- **H. Altenbach** (Martin-Luther University Halle Wittenberg, Otto-von-Guericke-University Magdeburg, Germany)
- **A. K. Belyaev** (IPME RAS, St. Petersburg, Russia)
- **I. I. Blekhman** (IPME RAS, Mekhanobr-tekhnika Corp., St. Petersburg, Russia)
- **F. M. Borodich** (Cardiff University, UK)
- **M. Cartmell** (University of Glasgow, UK)
- **A. Castellanos** (University of Seville, Spain)
- **A. V. Cherkaev** (University of Utah, USA)
- **V. A. Eremeyev** (Southern Scientific Center of RAS, Rostov State University, Rostov-on-Don, Russia)
- **A. B. Freidin** (IPME RAS, St. Petersburg, Russia)
- **S. N. Gavrilov** (IPME RAS, St. Petersburg, Russia)
- **S. F. Golovashchenko** (Ford Motor Company, USA)
- **I. G. Goryacheva** (Institute for Problems in Mechanics RAS, Moscow, Russia)
- **E. F. Grekova** (IPME RAS, St. Petersburg, Russia)
- **N. Gupta** (Indian Institute of Technology Delhi, India)
- **D. Harris** (University of Manchester, UK)
- **H. Irschik** (Johannes Kepler University of Linz, Austria)
- **B. L. Karihaloo** (Institute of Theoretical, Applied and Computational Mechanics, UK)
- **A. M. Linkov** (Rzeszow University of Technology, Poland)
- **E. V. Lomakin** (Moscow State University, Russia)
- **A. V. Manzhairov** (Institute for Problems in Mechanics RAS, Moscow, Russia)
- **G. Maugin** (Universite Pierre et Marie Curie, France)
- **A. Metrikine** (TU Delft, The Netherlands)
- **G. Mishuris** (Aberystwyth University, UK)
- **N. F. Morozov** (St. Petersburg State University, IPME RAS, Russia)
- **V. A. Palmov** (St. Petersburg State Polytechnical University, Russia)
- **E. Pavlovskaya** (University of Aberdeen, UK)
- **Y. V. Petrov** (St. Petersburg State University, IPME RAS, Saint-Petersburg, Russia)
- **D. Y. Raychuk** (St. Petersburg State Polytechnical University)
- **M. B. Rubin** (Technion, Faculty of Mechanical Engineering, Haifa, Israel)
- **A. I. Rudskoy** (St. Petersburg State Polytechnical University)
- **S. H. Sargsyan** (National Academy of Sciences, Armenia)
- **E. N. Vilchevskaya** (St. Petersburg State Polytechnical University, IPME RAS, Russia)
- **J. Wang** (Peking University, China)
- **M. Wiercigroch** (University of Aberdeen, UK)
- **M. V. Zakrzhevsky** (Institute of Mechanics Riga Technical University, Latvia)

PREFACE

Dear Reader,

in this book you will find the Proceedings of the Summer School II Conference “Advanced Problems in Mechanics (APM) 2015”. The conference had been started in 1971. The first Summer School was organized by Prof. Ya.G. Panovko and his colleagues. In the early years the main focus of the School was on nonlinear oscillations of mechanical systems with a finite number of degrees of freedom. Since 1994 the Institute for Problems in Mechanical Engineering of the Russian Academy of Sciences organizes the Summer School. The traditional name of “Summer School” has been kept, but the topics covered by the School have been much widened, and the School has been transformed into an international conference. Now it is held under the patronage of the Russian Academy of Sciences. The topics of the conference cover now almost all fields of mechanics, being concentrated around the following main scientific directions:

- aerospace mechanics;
- computational mechanics;
- dynamics of rigid bodies and multibody dynamics;
- fluid and gas;
- mechanical and civil engineering applications;
- mechanics of media with microstructure;
- mechanics of granular media;
- nanomechanics;
- nonlinear dynamics, chaos and vibration;
- molecular and particle dynamics;
- phase transitions;
- solids and structures;
- wave motion.

The Summer School – Conference has two main purposes: to gather specialists from different branches of mechanics to provide a platform for cross-fertilization of ideas, and to give the young scientists a possibility to learn from their colleagues and to present their work. Thus the Scientific Committee encouraged the participation of young researchers, and did its best to gather at the conference leading scientists belonging to various scientific schools of the world.

We believe that the significance of Mechanics as of fundamental and applied science should much increase in the eyes of the world scientific community, and we hope that APM conference makes its contribution into this process.

We are happy to express our sincere gratitude for a partial financial support to Russian Foundation for Basic Research, Russian Academy of Sciences, and St. Petersburg Scientific Center. This support has helped substantially to organize the conference and to increase the participation of young researchers.

We hope that you will find the materials of the conference interesting, and we cordially invite you to participate in the coming APM conferences. You may find the information on the future “Advanced Problems in Mechanics” Schools-Conferences at our website:

<http://apm-conf.spb.ru>

With kind regards,

Co-Chairmen of APM 2015

Dmitri A. Indeitsev, Anton M. Krivtsov

Contents

- B. Emek Abali, Wolfgang H. Müller, Victor A. Eremeyev.* **Numerical investigation of thin films with strain gradient elasticity** 11
- Anton V. Alfimov, Elizaveta M. Arysanova, Sergey A. Chivilikhin.* **Theoretical study of orientation effects during the multi-particle diffuse double layer interaction in monodisperse aqueous zinc oxide nanocolloids** 18
- A.K. Arutyunyan.* **Damage and long-term strength criterion of elastic-viscous aging media** 27
- R. A. Arutyunyan.* **Thermal brittleness and creep fracture of metallic materials** 32
- Vladimir A. Babeshko, Olga V. Evdokimova, Olga M. Babeshko, Igor B. Gladskoi, Elena M. Gorshkova.* **Directed antenna in block structure** 39
- I.I. Blekhman, L.I. Blekhman, L.A. Vaisberg, V.B. Vasilkov, K.S. Ivanov, K.S. Yakimova.* **Nonlinear Vibration Effects in Machinery, Fluid and Combined Media: Development of a Common Research Approach, New Results** 49
- Laurence A. Coles, Anish Roy and Vadim V. Silberschmidt.* **Finite-element modelling of 3d oblique ultrasonically assisted turning of TI-6AL-4V** 54
- Andrey I. Dmitriev, Werner Österle, Bernd Wetzel, Ga Zhang.* **The impact of nanoparticles on matrix properties in PMCS** 62
- Andrey I. Dmitriev, Anton Yu. Nikonov.* **Molecular dynamics study of the local frictional contact** 70
- Antonina N. Fedorova, Michael G. Zeitlin.* **From localization to zoo of patterns in complex dynamics of ensembles** 77
- Antonina N. Fedorova, Michael G. Zeitlin.* **Fast modeling for collective models of beam/plasma physics** 85

- Oleg K. Garishin, Ilya. A. Morozov, Vladimir V. Shadrin, Victor A. Gerasin, Maria A. Guseva.* **The study of structure and mechanical properties of polyethylene - silicate needle nanofiller at the macro and micro level** 93
- Dinara F. Gaynutdinova, Vladimir Ya. Modorsky, Vasiliy Yu. Petrov.* **Vibration and wave processes in view of non-linear deformation of components in aircraft engine hydraulic systems**100
- Sebastian Glane, Felix A. Reich, Wolfgang H. Müller.* **Kinematic fluid dynamos examined by toroidal-poloidal decompositions—An example of combining continuum mechanics and electrodynamic field theory** 108
- Alexei L. Glazov, Kyrill L. Muratikov.* **Photoacoustic thermoelastic imaging of indented areas in metals** 118
- Mikhail A. Guzev, Alexander S. Losev.* **The system of inverted pendulums** 125
- Jeroen S. Hoving, Andrei V. Metrikine.* **A mixed time-frequency domain method to describe the dynamic behaviour of a discrete medium bounded by a linear continuum** 132
- Antonio Jarquin-Laguna, Apostolos Tsouvalas.* **A semi-analytical impulse response method for transient laminar flow in hydraulic networks** 144
- Nikita Kazarinov, Vladimir Bratov, Yuri Petrov, Lucjan Witek, Arkadiusz Bednarz.* **Numerical simulation of ceramic plate penetration by cylindrical plunger** 159
- Chris Keijdener, Andrei V. Metrikine.* **A simple numerical model of a geometrically nonlinear Timoshenko beam** 166
- Kseniya S. Kuzmina, Ilya K. Marchevsky.* **High-Order Numerical Scheme for Attached Vortex Layer Intensity Computation in 2D Vortex Element Method** 177
- Simin Li, Mayao Wang, Xing Gao, Elizabeth A. Zimmermann, Christoph Riedel, Björn Busse and Vadim V. Silberschmidt.* **Frac-**
