

List of posters July 3

Session PS1

1. **K.Yu. Aristovich.** Determination of elastic modulus for nanocrystal objects using molecular dynamics method
2. **I.E. Berinsky.** Stability analysis of graphite crystal lattice using moment interactions
3. **V.A. Kuzkin.** Analytical modeling of protoplanet cloud fragmentation
4. **O.S. Loboda, A.M. Krivtsov.** Comparison of discrete and continuum modeling for 2D nanocrystal stripe vibrations
5. **P.V. Tkachev.** Stability and destruction of the material with microstructure
6. **S. Vasilyev, A.M. Krivtsov.** Simulation of the protoplanets system growth
7. **I.B. Volkovets, A.A. Le-Zakharov.** Parallel implementation of Burns–Hut algorithm for simulation of planet system formation
8. **E.N. Akimova, I.I. Gorbachev, V.V. Popov.** Parallel matrix sweep algorithm for solving the multicomponent diffusion problems
9. **A.A. Alabuzhev, D.V. Lyubimov.** Resonance oscillations of a cylindrical drop
10. **S. Alexandrov, E. Lyamina.** A constitutive law for damage evolution near frictional interfaces at large plastic strains
11. **A.I. Alexandrovich, A.A. Demidova.** Solution of plane border problems of nonlinear theory of elasticity for Signorini's body
12. **A.I. Alexandrovich, A.V. Gorlova.** Research of the equations of the flat theory of elasticity for physically nonlinear model
13. **A.I. Alexandrovich, I.A. Vorobyev, V.G. Zhovnovatyuk.** The solution of some boundary-value problems for the Korteweg-de Vries equation and the sine-Gordon equation by complex analysis methods
14. **A.I. Alexandrovich, V.G. Zhovnovatyuk, I.A. Vorobyev.** The solution of several three-dimensional thermal-elasto-plastic problems for alloys with the shape memory by local functionals method
15. **O. Alikina, E. Tarunin.** Calculation of heat transfer in vortex tube
16. **Yu.N. Bakhareva, Y.N. Radayev.** A numerical method for solution of three-dimensional problem of the perfect plasticity
17. **V.A. Arkhipov, I.M. Vasenin, V.L. Litvinov, V.F. Trofimov, U.M. Sheremetyeva.** Influence of the bond number on a drop stability in a flow
18. **E.B. Azarov, S.A. Rumyantsev.** Mathematical model of non-stationary dynamics “the vibration machine – the electric drive” system in case of a drive from asynchronous engines with a short-circuited rotor
19. **G.V. Vasilyeva, S.A. Rumyantsev.** Mathematical model of dynamics two-mass vibration machine
20. **A.V. Babushkin, A.A. Chekalkin.** Research of stress-strain state of powdered composites at multiaxial cyclic deformation
21. **G.A. Baizakova, A.K. Tomilin.** Electromagnetic management of resilient members toughness
22. **A.K. Tomilin.** Electromagnetic method of vibrodiagnostics of composite beam internal state
23. **D.V. Baldin, A.N. Zakhlevnykh.** Bistable transitions in ferronematics
24. **N.K. Balabaev, L.I. Manevitch, O.L. Manevitch, M.A. Mazo, G.C. Rutledge.** Analysis of structure and thermomechanical properties of a nanocrystalline plate

25. **E.K. Batsyna, V.A. Dubinina, A.A. Kurkin, O.E. Poloukhina.** Nonlinear three-wave interactions of edge waves over cylindrical shelf
26. **E.K. Batsyna, V.A. Dubinina, A.A. Kurkin, O.E. Poloukhina.** Influence of alongshore currents on the process of edge wave focusing
27. **A.A. Kurkin, O.E. Poloukhina, I.F. Nikolkina.** Unsteady dynamics of edge waves above a shelf slowly varied along shore
28. **A.K. Lekanov, O.E. Poloukhina, A.A. Kurkin.** Anomalous continental shelf waves
29. **A. Boudjada, J. Meinel, A. Boucekkine, S. Hamamda.** A combination of density functional theory calculations (DFT) and experimental studies: Molecular conformation in tri-iodomesitylene
30. **A.A. Berlin, V.G. Oshmyan, M.Yu. Shamaev, S.A. Timan.** Numerical modeling of the effect of nanoparticles' bending rigidity on the mechanical properties of filled systems
31. **I.I. Blekhman, G.E. Itkin.** Energetic and force barriers at the transitions between the stable states of dynamic systems
32. **I.I. Blekhman, V.B. Vasilkov, K.S. Yakimova.** Hydrodynamic resistance of a conic shape channel undergoing vibration
33. **V. Chaikin, E. Polyakova, I. Tarasenko.** On the theory of constitutive equations for mediums with hereditary properties
34. **E. Polyakova, V. Chaikin, O. Zuev.** On the problem of driving a soft shell along a rigid body enveloped by the shell
35. **E.O. Chil-Akopyan, M.V. Belubekyan.** The investigation of the asymptotics for the problems of the located instability of plate with free edge
36. **A.V. Chubinskiy.** Wave propagation in a composite plate loaded by a viscous fluid
37. **B. Cvetkov, P. Voinovich.** Accuracy analysis and 2D numerical simulation of reversed wave focusing by ultrasonic wave phase conjugation
38. **V.I. Dovgan, D.A. Kitaeva, Ya.I. Rudaev.** About structure formation self-organization at loading of quasibrittle materials
39. **O.Yu. Efimova, N.A. Kudryashov.** Two Reaction-Diffusion Models Describing the Evolution of Interrelated Populations
40. **V.A. Eremeyev, E.M. Kaidashev, A.V. Nasedkin.** Investigations of some nano-structures made of ZnO
41. **V.A. Eremeyev, A.N. Soloviev.** FEM modelling of 2D ZnO nanocrystals lattice
42. **E.N. Ivanov.** The problems of the mathematical modelling of some tubular bones
43. **D.A. Sukhov.** Convective stability in horizontal layer of micropolar fluid with free surface
44. **M.R. Enikeev, I.V. Penkova, O.K. Agatyan, V.A. Sergan.** The biomechanics of injuries of ankle-joint ligamentous apparatus
45. **D. Kubasov, V. Sikilinda, A. Polodjishnikova.** Application of biomechanically proved osteosynthesis in surgery of anterior segment of foot
46. **V.A. Sementzov, V.A. Sergal', A.A. Poloishnikova, R.S. Romanov.** To the biomechanics of patella fractures fixation
47. **N.V. Evlampieva, A.A. Tashkinov.** Study structured geometric and physical fields in problems of deformation of elastoplastic composites
48. **N.Y. Evlampieva, A.B. Freidin, E.N. Vilchevskaya.** Phase transformation of a cylindrical inclusion subjected to uniform external strain field

49. **V.I. Kondaurov, A.N. Lyubicheva.** Phase transitions in damaged material
50. **A.L. Kazakov.** Some gas flows which are solutions of generalized Cauchy problem
51. **N.B. Fedosenko.** Construction analytical computational grids with given properties
52. **N.B. Fedosenko.** An approach for incompressible flow calculation based on analytical solutions
53. **A.V. Fedotov, S.D. Furta.** On stabilization of rectilinear motion of a multilink system
54. **G. Kostin, V. Saurin.** Numerical analysis of linear elasticity problems based on integro-differential approach
55. **A.V. Kvanin, G.V. Kostin, V.V. Saurin.** Finding optimal parameters of a beam on elastic base under various loading
56. **I.V. Gnevanov.** Convective motion in plane layers with internal heat sources
57. **L.A. Golotina, L.L. Kozhevnikova.** Modeling of the rheological behavior of filled elastomers on structural grounds
58. **M. Holschneider, M.S. Diallo, M. Kulesh, K. Kurennaya.** Elliptic properties of surface waves in wavelet domain
59. **K. Kurennaya.** Nonlinear interaction of normal elastic waves in solids
60. **V.A. Il'in.** Electroconvection of poorly conducting liquid in the modulated electric field at presence of charge injection
61. **A.D. Sergeyev.** Buoyancy loss by a covered object due to bending of its flexible shell subjected to distributed pressure
62. **Y.V. Petrov, A.V. Kashtanov, G.I. Lihachev.** Initial damaging in Kachanov–Rabotnov’s kinetics theory
63. **A.I. Zhornik, V.A. Zhornik, A.A. Rybinskaya, P.A. Savochka.** Penny-shaped crack extension in cylinders under heating

Session PS2

64. **A.A. Ivanova, N.V. Kozlov.** Influence of vibration on behaviour of light solid in rotating cavity filled with liquid
65. **V.G. Kozlov, D.A. Polezhaev.** Experimental study of stability of vibrational liquid flow in a rotating cylinder
66. **V.G. Kozlov, A.N. Sal'nikova.** Behavior of two-liquid system in a rotating cavity subject to longitudinal vibrations
67. **Ya. Kolpakov, P.A. Zhilin.** A micro-polar theory for piezoelectric materials
68. **A.A. Komarova, I.V. Shirko.** The theory of limiting balance of the anisotropic loose environment
69. **E.V. Shishkina, M.P. Cartmell.** Vibrational stabilisation of elastic plates
70. **N.V. Kurbatova.** On a stretching-torsion of a naturally twisted rod
71. **N.M. Kuznetsova, N.V. Kurbatova.** On the FEM approach for a bending of a naturally twisted rod
72. **A.V. Zaitsev, A.V. Lukin, A.A. Tashkinov, N.V. Trefilov.** Regularities of multi-particle interactions in random structures and description of micro- and macrofailure of unidirectional fibre-reinforced composites
73. **I.Yu. Zoubko, P.V. Trusov.** Milling balls dynamics in the mechanical alloying process and simulation of dislocation structure formation of powder particles
74. **V.I. Dranovskij, V.S. Khoroshilov, A.P. Kovalenko, A.E. Zakrzhevskij.** Dynamics of deployment of a multilink design in orbit
75. **M.Yu. Filimonov, N.A. Vaganova.** Representation of solutions of boundary-initial problems for nonlinear partial differential equations by special series
76. **N.A. Vaganova, M.Yu. Filimonov.** Numerical simulations of heat propagation from deepen heat sources under non-plane surface with using parallel computers
77. **V.M. Fomin, E.I. Kraus, I.I. Shabalin.** An equation of state for gas hydrates in high pressure region
78. **Yu.G. Gordienko, E.E. Zasimchuk.** Two-stage substructure transformation of Al film as a manifestation of multi-scaling scenario
79. **E.P. Kligman, T.I. Kligman, N. Sevodina.** Natural vibrations of elastic shell with fluid
80. **E.P. Kligman, V.P. Matveyenko, N.A. Yurlova.** Definition and optimization of the dissipative characteristics of electroelastic shells
81. **V. Menshykov, O. Menshykov.** Interfacial plane crack under time-harmonic loading
82. **N. Kontchakova.** The lines of deformation field jumping in the plastic region in the Galin's problem
83. **D.P. Kouzov.** The fluid compressibility account of gravitation waves theory on the fluid surface
84. **N.A. Kovaleva, L.I. Manevitch, A.V. Savin.** Nonlinear twist dynamics of DNA macromolecule
85. **N.F. Kurilskaya.** Vibrations of conductive string with classical and non-classical boundary conditions in magnetic field
86. **N.F. Kurilskaya.** On magnetostrictive vibrations of conductive string in magnetic field
87. **N. Mestanzade, G. Yazici.** Model testing of offshore structures
88. **T.B. Lavrova.** The properties of the plane-strain quasi-static equations for a rigid-plastic material with anisotropic hardening
89. **N.F. Lebedeva-Karlsson.** Analitical modeling shock waves in curved coordinates
90. **V.A. Levin, N.A. Lutsenko.** On influence of form of homogeneous porous fuel element on cooling process

91. **M.S. Mkrtchyan, S.M. Mhkitaryan, S.V. Verlinsky.** Stress tension of piece-wise strip with collinear system of cracks or thin insertions during antiplane and plane deformations
92. **S.V. Verlinsky.** Stress-deformation tension of piece-wise homogeneous elastic half-plane with system of collinear cracks or rigid insertion along with temperature impact
93. **N.F. Patsegon, L.N. Popova.** Autowaves in magnetic fluid
94. **M.N. Perelmuter.** Multilevel model of strength and fracture toughness of nanocomposites
95. **A.L. Levitin.** The influence of notches and cuts on the specimens stability under tension
96. **O.N. Lubimova.** Definition of residual pressure during making three-layers of shell on base glass and metal
97. **V.V. Moshev, S.E. Evlampieva.** Model of a structural element in elastomeric composites filled with nanoparticles
98. **N.Ye. Nikitina.** Acoustoelasticity phenomenon using for in-plane stress evaluation of civil engineering structures
99. **M.A. Osipenko, Yu.I. Nyashin, S.I. Brynskikh.** The optimal biomechanics of the foot prosthesis with the variable thickness leaves
100. **A. Pershakova, D. Luchinskii, A. Stefanovska, P.V.E. McClintock.** Stochastic coupled circle maps with applications to modelling of the human cardiovascular system
101. **V.E. Petrova, K.Herrmann.** Thermal fracture of a bimaterial containing internal defects
102. **A.N. Prokopenya.** On the stability of cylindrical precession of dynamically symmetric satellite on the elliptic orbit
103. **M.A. Ryakina, E.L. Tarunin.** Convective flow in a spherical backlash in conditions of microgravity
104. **Yu.N. Sayfutdionov, S.A. Lychev.** The dynamical reaction of a 3-layered viscoelastic shell
105. **Yu.I. Rudnev, D.I. Borisov.** Small oscillations of ideal fluid in vessels with perforated bafflers
106. **V.N. Salnikov.** Nonlinear dynamics of the systems in the Nose-Hoover environment
107. **D.N. Sheidakov, L.M. Zubov.** Stability of a rectangular plate under biaxial tension
108. **A.Sokolov.** A new model of orthotropic incompressible nonlinear elastic material
109. **M.I. Shmurak, V.M. Tverier, E.Y. Simanovskaya, Y.I. Nyashin.** Biomechanical model of the mamma
110. **M.B. Soloviev.** Construction of analytical-numeric solutions of border problems of plane stationary flows of incompressible linear viscous fluid using finite analytical elements method
111. **S. Soshenkov.** Evolution of three-dimensional elastic bodies profiles in rolling contact
112. **L.V. Stepanova.** On creep–damage coupled boundary value problems in fracture mechanics
113. **E.L. Tarunin.** Asymmetrical oscillations peculiarities review
114. **Yu.P. Stefanov.** Numerical investigation of fracture and strain localization in geomaterials
115. **A.V. Utkin, I.E. Golovnev, V.M. Fomin.** Influence of the molecular characteristics of matter on detonation phenomena
116. **N.P. Yaroshevich.** Numerical simulation of self-synchronization phenomenon of mechanical vibro-exciter
117. **E.D. Sviageninov.** Resonance siren based on forward and backward running waves and its microwave analogue
118. **A.L. Svistkov, L.A. Komar.** Modeling of the behavior of filled elastomeric materials with regard for the influence of a filler volume fraction
119. **T.P. Tovstik.** On the influence of friction on the Celt rattleback motion
120. **N.A. Tsikova.** Transformation Matrix of vibration waves on junction of round cylindrical rods

121. **M.M. Vetyukov, R.F. Nagaev, M.M. Utimishev.** The simulation of periodic processes in vibratory jaw crusher allowing for influence of crushed material
122. **I. Vulfson.** Subharmonic resonance arising due to the change of effective dissipative forces with action of polyharmonic excitation
123. **I.N. Wasserman.** Influence of Coulomb friction on oscillations of sucker rod and tubing strings in oil wells
124. **V.E. Wildemann, M.V. Polyakov, A.M. Tsipliyakov.** Elements of strength analysis of deformable systems on the basis of failure kinetics description
125. **A.N. Zakhlevnykh, O.R. Semyonova.** Orientational and magnetic structure of a ferronematic with bistable anchoring on the boundaries of a layer
